## A changing economy. A changing society. A changing environment. Are we ready for the future? How can we manage complexity and change?

The UN Sustainable Development Goals (SDGs) recognise that challenges facing the world today are complex and require new solutions. The Australian Government has signed up to the SDGs and more and more businesses are reporting on them.

If Australia is to realise the benefits of the SDGs, we need to be clear about what they are and how we're performing against them. The *Transforming Australia: SDG Progress Report*, developed by the National Sustainable Development Council, provides an independent assessment of Australia's progress in implementing the goals.

The National Sustainable Development Council is a collaborative body that brings together experts from government, business, research and civil society.

### Achieving growth that's good for all.

Healthy communities, a healthy economy and a healthy environment create the conditions where businesses can flourish. Big challenges require big solutions. To tackle these challenges, we need to work together.

Join us to explore these new opportunities. Learn how you can use the *Transforming Australia: SDG Progress Report* to inform your planning and strategies, to help achieve a thriving, prosperous country with no one left behind.

### SPEAKERS
